Java / .Net Developer (Middle level)

Job Responsibilities:

- Design, develop, test, and maintain applications using Java or .NET (C#)
- Participate in full software development life cycle (SDLC) activities and can write clean, scalable, and efficient code
- Develop APIs (RESTful and SOAP) for integration
- Experience with databases like PostgreSQL, SQL Server, Oracle and optimize database performance
- Can write complex SQL queries, stored procedures, and triggers
- Analyze and resolve technical and application problems
- Provide support for production systems and troubleshoot performance issues
- Conduct and participate in code reviews to ensure high-quality deliverables
- Maintain documentation for code, systems, and technical processes
- Translate business requirements into technical specifications

Requirements:

- Bachelor's degree or equivalent in Computer Science, Engineering, or a relevant field, or equivalent proven industry experience.
- At least 3-5 years of Java or .NET (C#) experience is strongly preferred.
- Understanding of SDLC, Agile/Scrum methodologies
- Proficiency in Git, GitHub/GitLab/Bitbucket
- Strong debugging and problem-solving skills
- Knowledge of front-end technologies such as HTML, CSS, and JavaScript.
- Excellent communication skills and ability to work collaboratively in a team environment.
